

No. AI057

Certificate of Analysis

Product Name: Poly(N-isopropylacrylamide)-N-hydroxysuccinimide endcap
(Lot#: 181112RAI-A)

Inherent Viscosity Analysis

Method: 2 g/dL solution of P(NIPAM)-NHS dissolved in methanol and viscosity tested using a Cannon mini-viscometer (C286) in a 25C water bath. Average of 3 times taken and viscosity compared to literature reported values for pure methanol at 25C to obtain inherent viscosity. Data shown as average \pm 95% confidence.

P(NIPAM)-NHS Inherent viscosity in MeOH (25°C)	0.257 \pm 0.013
